

SURUBELNITE

Manere cu design ergonomic

La calitate superioara a materialelor folosite pentru gama de surubelnite Unior se adauga manere de concepie ergonomica care permit o excelenta calitate a prizei.

Manere tri material

Multumita asocierii suprafetelor rigide cu cele mai moi, manerul special cu trei componente (brevetat Unior) permite o folosire eficace si confortabila care solicita putin incheietura in timpul lucrului

Priza antiderapanta

Concepute pentru a se adapta la o mare varietate de profile de suruburi si avand un maner din tricomponent, surubelnitele Unior asigura o mare eficaitate si o priza anti alunecare.

Manerele TBI pentru surubelnite sunt compuse din trei straturi, dupa cum urmeaza:

Strat 1: Polipropilena neagra, care inconjoara axul surubelnitei si care este extrem de dura, prevenind rotirea axului in maner la cupluri mari

Strat 2: Polipropilena albastra, care inconjoara primul strat. Este foarte rigid si asigura forma constanta a manerului fata de diverse solicitari exterioare.

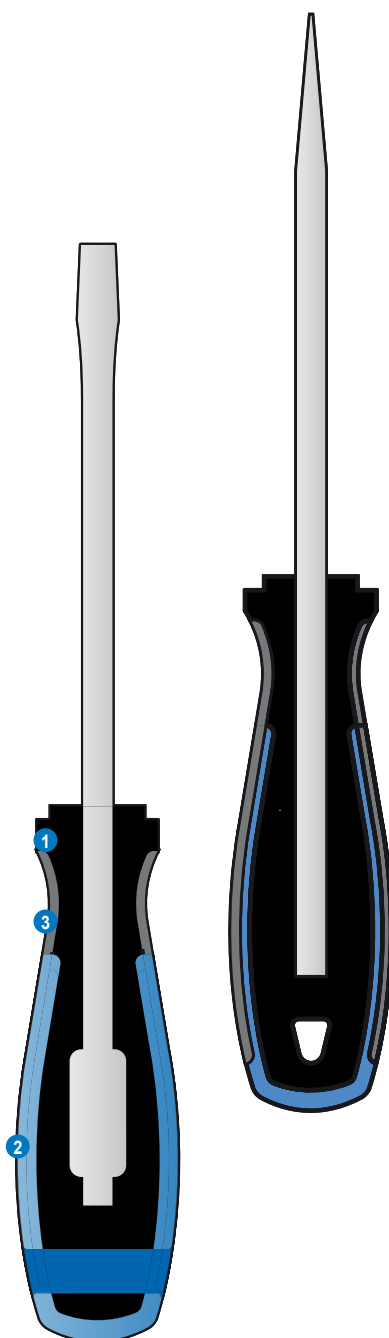

Strat 3: TPE gri (elastomer termoplastic) care inconjoara partial stratul 2 al manerului, este un material de rezistenta medie care da manerului forma finala ergonomica, asigura o prindere placuta si aderenta si - consecinta - realizarea unor cupluri mari.

Capabile sa se potriveasca cu o varietate mare de profiluri de surubelnite si avand manerele tri-component, surubelnitele Unior asigura o eficienta sporita si o prindere antiderapanta

Surubelnitele sunt facute din otel crom-vanadiu-molybden si sunt in plus cromate sau nichelate. Calitatea superioara a materialelor folosite in linia Unior de surubelnite este complementata de manerele ergonomice care furnizeaza o prindere excelenta.

Cu combinatia de suprafete dure si moi, manerele speciale din trei componente - un patent Unior - asigura confortul si performanta eficienta cu tensiuni minime asupra incheieturii in timpul lucrului.

Impreuna cu consistenta variata a manerului de plastic, practic eliminand riscul de alunecare a surubelnitei in mana, prinderea imbunatatita asigura de asemenea si un cuplu sporit. Acesta poate fi obtinut si prin introducerea unei tije in perforatia facuta in acest scop in toate manerele, gaura care poate fi folosita si la agatarea la depozitare.

Surubelnite drepte	201

Surubelnite cu cap sferic si pentru cap hexagonal	205
Surubelnite Torx	206
Surubelnite patrute si cu cap tubular	207
Magnetizor; maner clichet si lame	210

Cuplu de strangere mai mare

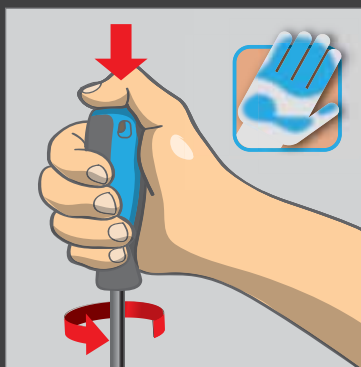

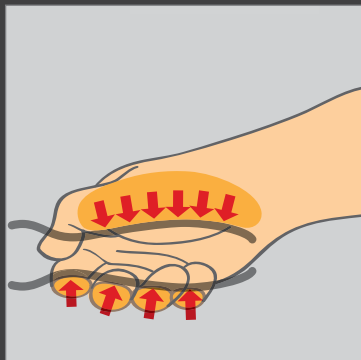

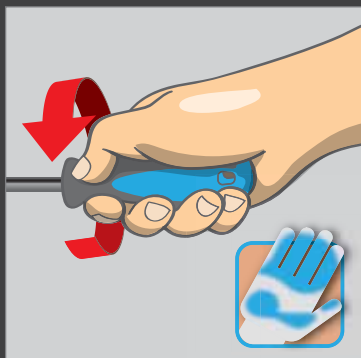

Nu numai ca materialul compozit al manerului elimina practic orice risc de alunecare a surubelnitei in mana, dar cea mai buna calitate a prizei obtinuta in acest fel este obtinerea unui cuplu de strangere mai mare. Acelasi efect poate fi obtinut de asemenea (cu exceptia manerelor de lemn) inserand o tija in gaura adaugata in acest scop tuturor manerelor noastre si care poate de asemenea servi la o mai buna organizare prin suspendare

MANER ERGONOMIC

Combinatia de suprafete dure si moi imbunatateste factorul de incarcare si asigura insurubarea usoara. Manerul a fost conceput in asa fel incat are grija de sanatatea utilizatorului pentru ca reduce tensiunea in muschii mainii

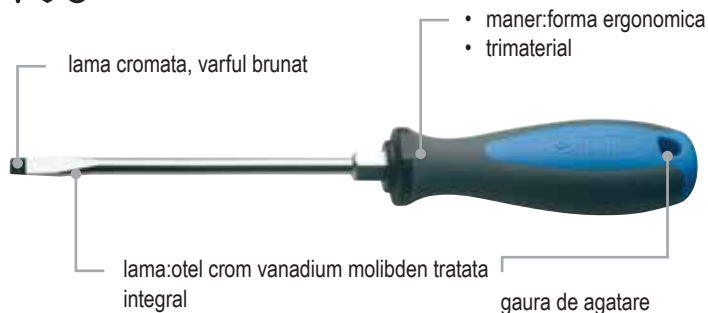

Suprafata maximala de contact a mainii = valoare de cuplu superioara

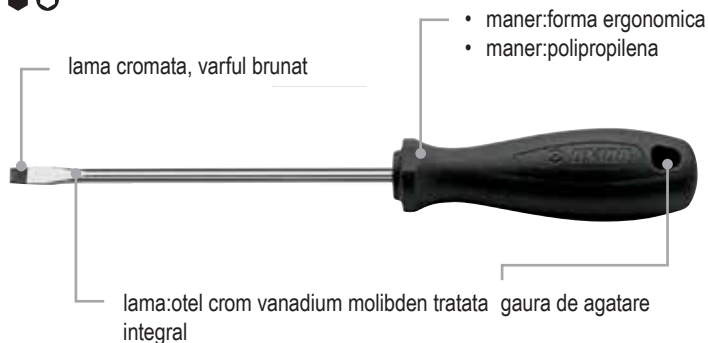

Conceptia ergonomic a manerului = protejarea mainii

SURUBELNITE CU MANER TRIMATERIAL

Maner cu forma ergonomica

Calitatea superioara a materialelor utilizate in gama de surubelnite Unior este completata de manerul cu forma ergonomica pentru a oferi o prindere excelenta.

Moment de torsiune marit

Odata cu consistenta variata a manerului de plastic eliminand practic pericolul de a aluneca surubelnita in palma, manerul imbunatatit asigura de asemenea si o strangere mai buna. Acest lucru poate fi, de asemenea, realizat prin inserarea unei tije in gaura manerului, adaugata cu acest scop, la toate manerele (cu exceptia surubelnitelor cu maner de lemn), functionand de asemenea si ca locas pentru agatat.

Material cu trei componente

Prin combinatia sa de materiale netede si aspre, manerul special cu trei componente - brevetat Unior - asigura confort si performanta cu minim de efort in timpul lucrului.

Aderenta maxima

Capabile sa asigure o varietate diversa de profile, manerele inovatoare cu trei componente confera surubelnitelor Unior o inalta eficienta si maxima aderenta.

Suprafata de contact mare = mai multa forta de torsiune

Forma ergonomica a manerului = protectia mainii
