Picture of our Production - 1920

Excellency Award 2017

Aerial view of the Company - 1950

The **Tomé Fêteira** File Company was founded in 1856 by Joaquim Tomé Fêteira, and has grown to be a modern and diversified manufacturing plant with a worldwide established name in producing high quality professional products.

For more than one and a half centuries our constant technical research and development, and our highly skilled and trained workers have lead this company to be one of the most important manufacturers in Europe and amongst the few top companies in the entire world.

The experience gained by Tomé Fêteira in the manufacturing of files and rasps is also being used to develop new metallurgical products and machinery with the same high performance quality : Our Smart Cut specially designed saw blades and our Silver Bullet and Equistar horse rasps are making worldwide success. Our Forging Machines for Files and Chisels continue unbeatable concerning technology, efficiency and reliability. We are also on the top of modern technology with our Induction Hardening Systems, our File Sharpening Systems, our Dry Sandblasting Equipments with run through belts, and many other innovative products.

As a reward for our outstanding performance, we are proud to inform that we have been awarded by lapmei – Portugal's Governmental Production and Export Institute, **PME Excellency 2017**.

In more than 70 countries where our products are sold, Tomé Fêteira has a network of representatives, agents and distributors giving efficient backup service to buyers and users.

The constant search for improved quality and the rigorous inspection of each Tomé Fêteira product ensure that they are of a standard unmatched anywhere in the world market.

These are the principles which make the well known Tomé Fêteira brand demanded by users all over the world.

Michael Braun
President

Elisabeth Braun
Vice President

**TECHNICAL
INFORMATION**

All our files and rasps are made of high quality chromium alloy steel and hardened individually up to 64 HRC in order to assure an excellent grip even on very hard materials.

The hardness and the special depth and angle of the teeth cuts on our files give them much more resistance to wear even under intensive professional use.

We produce hundreds of different types of files and rasps, varying in shape, size, cross-section and cut. Our file measurements and the density of cuts are according to standard specifications.

The most common cuts for normal files and rasps are Bastard- Cut 1, Second Cut – Cut 2 and Smooth- Cut 3. Although, when precision files are concerned Cut 0 – Very Coarse and Cut 4 – Dead Smooth, are also much requested. Also, Engineering files present a double cross-cut while Sharpening files have only a single cut.

When you order, you must choose the file shape (flat, round, square. Etc.), the size (150mm, 200mm, etc.) and the type of teeth cut (bastard, smooth, etc). You will find more detailed ordering information at each catalogue page.

**TECHNISCHE
INFORMATION**

Alle unsere Feilen und Raspeln sind aus hochwertigem Chromlegierungsstahl gefertigt und einzeln bis zu 66 HRC gehärtet, um auch bei sehr harten Werkstoffen eine hervorragende Griffigkeit zu gewährleisten.

Die Härte, die besondere Tiefe und der Winkel der Zähne geben unseren Feilen eine viel höhere Standzeit, auch unter intensivem professionellem Gebrauch.

Wir produzieren Hunderte von verschiedenen Arten von Feilen und Raspeln, variieren in Form, Größe, Querschnitt und Hieb. Unsere Abmessungen und die Hiebanzahl entsprechen den Standardvorgaben.

Die häufigsten Hiebarten für normale Feilen und Raspeln sind Bastard-Cut 1, Second Cut - Cut 2 und Smooth-Cut 3. Obwohl, wenn Präzisionsfeilen betroffen sind, werden auch Cut 0 - Very Coarse und Cut 4 - Dead Smooth, viel verlangt. Werkstattfeilen haben einen Doppelhieb, auch Kreuzhieb genannt, während Sägefeilen nur mit einem Singlecut, Einzelhieb produziert werden.

Bei Bestellungen bitten wir Sie folgende Details bekanntzugeben, Feilenart (flach, rund, quadratisch usw.), die Größe (150mm, 200mm, etc.) und den Hieb. (Bastard, 2nd cut, Smooth, etc.) Weitere detaillierte Bestellinformationen finden Sie auf jeder Katalogseite.

**INFORMAÇÃO
TÉCNICA**

Todas as nossas limas são feitas em aço ao cromo de alta qualidade e temperadas individualmente até a dureza de 64 HRC de forma a assegurar um corte de elevado rendimento mesmo em materiais muito duros. A dureza e a profundidade do corte dos dentes conferem às nossas limas uma resistência excepcional ao desgaste, mesmo sob uso intenso e profissional.

Produzimos centenas de limas de diferentes perfis, tamanhos e cortes. As dimensões das nossas limas e a densidade dos cortes/ dentes estão de acordo com as normas standard.

Os tipos de picado mais comuns são Bastardo- Cut 1 , Meio-Murço – Cut 2 e Murço- Cut 3. No entanto, no que diz respeito a limas de precisão, o picado Cut 0 – Muito Bastardo e picado Cut 4 – Muito Murço, são também muito procurados. É ainda de notar que as limas para desbaste apresentam um picado duplo/cruzado enquanto que as limas para afiar serras e ferramentas apresentam um picado simples.

Para encomendar, deve ser escolhido o formato da lima (redonda, paralela..) o tamanho (150mm, 200mmm...) e o tipo de picado (murço, bastardo...). Encontrará informação mais detalhada em cada pagina do catalogo.

CX CHROMINOX®
Up to 72HRC

Hardness by Hi Tech Coating
Härte Durch Hi Tech Beschichtung

Ordering code = File code + C (Chrominox)

Chrominox coating can be applied on all of our files and rasps with the following advantages:

- Hardest possible coating for files
- No clogging, no rusting
- Multiple usage and performance
- Solves working problems on stainless steel, alloys of steel, nickel and copper.

Die Beschichtung von Chrominox kann auf allen unseren Feilen und Raspeln mit den folgenden Vorteilen aufgetragen werden:

- Härteste Beschichtung , die bei Feilen möglich ist
- Kein Verstopfen, kein Verrosten
- Mehrfache Gebrauchs- und Leistungsfähigkeit
- Löst Bearbeitungsprobleme an hartem und zähem Material wie Nirosta, Stahl-, Molybdän-, Nickel-,Kupfer-/ Wolframlegierungen und Kunststoffen aller Art!

SHARPENING FILES
SÄGEFEILEN
LIMAS PARA AFIAR

crossblades®

Crossblades Snowshoes - the new dimension in winter sports!

One device for 3 winter sports :

Snowshoe hiking:

Easy ascent with climbing skins and pleasurable descend

Backcountry skiing:

Suitable for easy backcountry ski touring.

Skiing:

Ideal for slopes as well as for off pist skiing - and Crossblades are suitable on any kind of ski lift!

Crossblades - and the winter is yours !

Crossblades come with a soft boot binding for mountaineering boots, hiking shoes, trekking shoes and soft boots, or with a hard boot binding for skiing and touring boots.

Crossblades are a high-tech innovation. By using the highest quality materials they guarantee the best ascending, skiing and gliding performance on powder snow as well as on slopes - the fun factor comes free.

Using Crossblades you can walk and ski completely freely and independently of the marked slopes or specified trails

SMARTCUT BOWSAWS
BÜGELSÄGEN
SERRAS DE ARCO

Technical Information

- In 1985 the Royal Institute of Technology in Stockholm investigated the constructing business. They discovered that one of the most common injuries was that the workers cut themselves in their hands while working with a bowsaw. This was due to the fact that Bowsaws were only available with big teeth for fast cut. With a patented technology based on computerized manufacturing we can now produce sawblades with small teeth for a safe start, medium size teeth for high precision and big teeth for fast cut, all on the same blade.

COMBI SAW 12"

Bow + 1 blade for wood + 1 blade for metal

1 Sägeblatt zum Bearbeiten von Holz, 1 Sägeblatt zum Bearbeiten von Metall und Plastik.

Arco+1 lâmina p/ madeira + 1 lamina p/ metal

IBS Hot Forging Machines

FORGING MACHINES FOR FILES AND CHISELS SCHMIEDMASCHINEN FÜR AKTEN UND MEISSEL MAQUINAS PARA FORJAR LIMAS E PONTEIROS

We have been developing and producing our Hot Forging Machines for more than 70 years, and have gained the market recognition for their high quality standard and extreme reliability. These Machines were specially developed for precise, fast and economic forging of several tools, namely file tangs and points and chisel points, of different formats : flat, square, triangular, round, hexagonal, etc.

The robust machine construction allows the shaping of all metallic materials, in particular of construction and tool steel.

These machines have a high hourly output, approximately double of common power hammers and a high degree of exactness.

Machine Specifications		SM401	SM402	SM403	SM601	SM602
Forging Capacity (mm) Cross Section x Length		10X120	24X90	50X120	10X120	24X90
Greatest Possible Forging Length (mm)		140	165	175	140	165
Working Pressure Max (N)		120000	220000	450000	120000	220000
Stroke (num/min)		1200	1000	800	1200	1000
Motor Output 1400 U/min (KW/PS)		11/15	15/20	18/25	15/20	18/25
Dimensions (mm)	Width	1600	1700	1800	1750	1850
	Depth	1100	1200	1400	1100	1200
	Height	1550	1600	1650	1600	1680
Transport Details						
Weight (Kg)	Gross	2000	2750	3900	2800	3850
	Net	1900	2600	3700	2700	3700
Create Dimen.	Width	1750	1850	1950	1900	2000
	Depth	1250	1350	1550	1250	1350
	Height	1750	1800	1850	1800	1880

Type:

4 Hammers

Models:

SM401, SM402, SM403

Type:
6 Hammers

Models:
SM601, SM602

The experience gained by Tomé Fêteira in over 160 years of manufacturing files and rasps is also being used to develop new machinery for file production and other different uses. In fact, we are the most important worldwide supplier of machinery for file productions.

Our Hot Forging machines are the best example - We supply them to most of the biggest file manufacturers around the world, and also to the most important chisel makers.

But, we are also on the top of modern technology with many other equipments. Our Induction Hardening Systems and our Induction Heating Systems are used not only by the file and the chisel industry, but also in the glass mould industry for heating up the moulds before brazing. We prepare individualized solutions for each induction heating demand.

Our File Sharpening Systems and our Dry Sandblasting Equipments, both with run through belts, are also best sellers.

Of course, file cutting machines, either automatic or semi-automatic, with or without feeders, and all machinery concerning file and rasp production we produce and supply.

We have the know-how and manufacturing capacity to install complete production lines for different types of files, and we are regularly asked to do so. We supply Key in hand solutions, including training and know how transfer.

Please contact us for more detailed information about your needs.
